

ZETDC HRE IT 03/001 INCIDENT MANAGEMENT RISK REGISTER

	ACTIVITY	RISK BASED THINKING (ISO 9001:2015)		ENVIRONMENT (ISO 14001: 2015)		OCCUPATIONAL HEALTH AND SAFETY (ISO 45001:2018)	
		RISKS/ OPPORTUNITIES	CONTROLS	ASPECTS	IMPACTS	HAZARD	RISK
1	User Reports An Incident – Service Desk/Phone Call/Email	- Wrong details - False alarm - System unavailability (Service desk/Email/Tel ephone lines) due to power cuts / computer hardware failure / I. T. network challenge	- Confirmation of report - Walk-in reporting - Use of backup power - Periodic maintenance and replacement of old hardware and network - Provision and use of alternative network links	-	-	- Too much light from computer screen - Repetitive tasks - Telephone noise - COVID 19 carrier (for walk-in clients and manual request forms) - Violent Clients	- Eye strain - Ergonomic injuries - Audiometric injuries - COVID 19 infections - Assault
2	Incident Identification	Taking too long to identify incident	- Technical expertise required (training) - Escalate incident	-	-	- Poor lighting - Dusty environments	- Eye strain / accidents - Pneumoconiosis
3	Incident Logging	- Wrong capture of details - System unavailability (Service desk/Email/Tel	- Maximum concentration required - Use of backup power - Periodic maintenance and	Electricity Usage for incident logging		- Too much light from computer screen - Repetitive tasks - Telephone noise	- Eye strain - Ergonomic injuries - Audiometric injuries

		ephone lines) due to power cuts / computer hardware failure / I. T. network challenge	replacement of old hardware and network • Provision and use of alternative network links				
4	Incident Categorisation	• Wrong categorisation	• Maximum concentration required	-	-	-	-
5	Incident Prioritisation	• Wrong prioritisation which can have an impact on the organisation's goals	• Maximum concentration required • Teamwork	-	-	-	-
6	Initial Diagnosis	• Wrong diagnosis of incident	• Maximum concentration required • Technical expertise required (training) • Teamwork • Escalation	-	-	• Wrong handling of tools	• Injuries / disablement / death
7	Investigation & Diagnosis	• Taking too long to troubleshoot	• Technical expertise required (training) • Escalate incident	-	-	• Poor lighting • Dusty environments	• Eye strain / accidents • Pneumoconiosis

8	Resolution & Recovery	• Unavailability of transport for site visit. • Incident might remain in progress or on hold while Service has been restored. • System unavailability (Service desk/Email/Tel ephone lines) due to power cuts / computer hardware failure / I. T. network challenge	• Use of remote support where possible • Follow ups • Use of backup power • Periodic maintenance and replacement of old hardware and network • Provision and use of alternative network links	Electricity usage for testing of resolution	-	• Working at a height • Wrong lifting of equipment • Wrong handling of tools • Equipment malfunction	• Injuries / disablement / death • Injuries / disablement / death • Injuries / disablement / death • Injuries / disablement / death
9	Incident Closure	• Closure of wrong incident • System unavailability (Service desk/Email/Tel ephone lines) due to power cuts / computer hardware	• Thorough checking • Manual closure • Use of backup power • Periodic maintenance and replacement of old hardware and network	• Electricity usage • Usage of ink and paper	• Deforestation • Bulky paper filing	• Too much light from computer screen • Repetitive tasks	• Eye strain • Ergonomic injuries

		failure / I. T. network challenge	Provision and use of alternative network links
