This document hereby certifies thathas
successfully commissioned the Net Metering interconnector in the presence of
.....of ZETDC at the below mentioned address:

.....
.....
.....

Account/ Prepaid Meter Number ENM1 Permit Number

Commissioning Start Date: End Date

Output Capacity kW

Commercial conditions:(These conditions must be read together with conditions of supply at the back of E22)

Customers on Net Metering shall receive bills at the end of every monthly billing cycle.
The exported energy shall be recorded in separate registers to the imported energy from ZETDC in the energy meter and split into Time Of Use (TOU) for Maximum Demand Customers.
The resultant bill shall be a net of the exported energy at the appropriate compensation factor and the imported energy as indicated in the Net Metering regulations which commenced as 0.9 in the SI 86 of 2018.

If the resultant is a Net Export, the value of units shall be credited to the next billing cycle.

If the resultant is a Net Import then the customer will be liable to pay the obtaining value of energy in that billing cycle.

The other terms and conditions are resident in the Net Metering Regulations and reference shall be made to the latest available version.

The parties have completed the successful commissioning of the plant and append their signatures below:
