4. DEFINITIONS

4.1 GM – General Manager

4.2 HRAM – Human Resource and Admin Manager

4.3 CRO – Chief Risk Officer

- 4.4 SHO –Safety and Health Officer
- 4.5 EMS -Environmental Management System.
- 4.6 OHS – Occupational Health and Safety
- 4.7 SAZS – Standards Association of Zimbabwe Standard.
- 4.8 ISO – International Organisation for Standardisation.
- 4.9 P - Procedure.
- 4.10 First aid – refers to medical attention that is usually administered immediately after the injury occurs and at the location where it occurred.
- 4.11 Decontamination – making something less harmless or more friendly to the environment

5. ACTIVITY DESCRIPTION

5.1 Requirements for first aiders

- 5.1.1 At least one first aider must be available for every 50 workers and for each working team.
- 5.1.2 First aiders must be qualified by an agency approved by legislation e.g. Red Cross/ St Johns/ EMRAS.
- 5.1.3 Specialist training may be required in hazards specific to the working environment – for example electrical hazards, snake bites.
- 5.1.4 Refresher training of first aiders will be done every 3 years and records must be kept of all training provided.

5.2 First Aid Equipment

- 5.2.1 Every first Aider and all Supervisors must have access to the first aid equipment.
- 5.2.2 All first aid equipment must be checked, restored by first aider after use.
- 5.2.3 The First Aider shall do an inspection on first aid equipment every month and resupply of necessary equipment and materials shall be done after the inspection.

5.2.4 The First Aiders shall be responsible for maintaining first aid equipment and records must be kept of these activities and supplies used.

5.2.5 An emergency contact list shall be placed in all first aid boxes and posted on strategic points in the premise

5.3 All first aid cases dealt with by the first aider shall be recorded.

5.4 A first aider should document history and services provided after attending to every case in a counter book provided.

5.5 First aider shall take part in accident investigations.

5.6 Blood- borne pathogens control requirements

5.6.1 Gloves will be worn when it can be reasonably anticipated that the first aider may have contact with blood and when handling and touching contaminated items or surfaces

5.6.2 Disposable gloves will be replaced as soon as practical when contaminated or as soon as feasible if they are torn, punctured.

5.6.3 Glove liners or other similar alternatives will be readily accessible to those first aiders who are allergic to the gloves.

5.6.4 Masks, in combination with eye protection devices, such as goggles or glasses with solid side shields will be worn whenever splashes, droplets of blood may be generated.

5.6.5 If a garment is penetrated by blood or other potentially infectious materials, the garment will be removed immediately, as soon as feasible.

5.6.6 Contaminated laundry will be handled as little as possible.

5.6.7 Gloves must be worn when handling contaminated laundry and must be washed separately after decontamination.

5.6.8 All employee exposure incidents shall be reported, investigated, and documented.

5.6.9 Following a report of exposure incident, an exposed employee shall receive a confidential medical evaluation and follow up.

5.6.10 Documentation of route of exposure and the circumstances under which the exposure incident occurred will be done.

5.6.11 Hepatitis B vaccination to first aiders shall be offered every five years at no cost since they have potential exposure

5.7 Remoteness of site from emergency medical services

5.7.1 The nearest government medical centre (For example Chiredzi, Mutare, Masvingo, Chipinge Hospitals) are about 4km from the nearby depots/ premises.

5.8 Level of response routine accidents. The First Aider shall

5.8.1 Check and ensure safety of the casualty, bystanders, him or herself.

5.8.2 Identify the casualty's condition: - Get history (what happened)

5.8.3 Check the signs like bleeding, swelling & give immediate and appropriate help.

5.8.4 Arrange for casualty to be taken home, clinic or hospital.

5.8.5 Notify the immediate supervisor.

5.8.6 Ensure the accident/incident report form is completed.

5.9 Level of response emergencies

5.9.1 Level of response shall be dealt with as per Emergency preparedness & response procedure

5.10 **Protocols for worst case scenario**

5.10.1 In the event of a fatality during execution of first aid.

5.10.2 The First Aider should contact the ambulance to assist in confirmation on status of patient.

5.10.3 If the patient is declared dead follow the emergency response plan for fatality.

5.11 Decontamination & Waste disposal

5.11.1 For routine decontamination

5.11.1.1 Jik shall be put on all contaminated surfaces before cleaning is done.

5.11.1.2 Waste generated during first aid activities shall be placed in bio hazard bags provided and should be taken to the nearest clinic for final disposal.

5.11.2 For Emergency decontamination

5.11.2.1 100% Jik shall sprayed on all contaminated surfaces by First Aider

5.11.2.2 The area is cleaned up with water until clean.
