4.3 Hazard- Source or situation with a potential for harm in terms of injury or ill health, damage to property, damage to the workplace environment, or a combination of these (SAZS OHSAS18001).

4.4 Risk- The combination of the likelihood and consequence(s) of a specified hazardous event occurring (SAZS OHSAS18001).

4.5 Risk assessment- Overall process of estimating the magnitude of risk and deciding whether or not the risk is tolerable (SAZS OHSAS18001).

4.6 SHE – Safety, Health & Environment

4.7 SAZS – Standards Association of Zimbabwe Standard.

4.8 ISO – International Organisation for Standardisation.

4.9 P - Procedure

5. ACTIVITY DESCRIPTION

5.1 A team of people shall do the identification of occupational hazards and environmental aspects. The team members shall be nominated from a group of trained people. Other members can be nominated to the team by virtue of their expertise required in that department where necessary.

5.2 The team members should have knowledge of the activities products and services for the departments in which they will be identifying the hazards and aspects.

5.3 The HSO shall ensure that hazards and aspects for all departments are properly identified and scored.

5.4 Identification of occupational hazards and risks and environmental aspects and impacts shall consider past, present and future activities products and services as well as emergency situations.

5.5 Consider the development of new activities, products and services during hazards and aspect identification. These may include:
