

<u>Construction Work Resulting In Additions Or Alterations To Main System Control Diagrams</u>	<u>Instruction 1/2</u>
	Pages: 2
Engineering Instruction 1	Date Issued : 03-08-2009
	Supersedes: 20 August 2007
Prepared By T. S. Sithole Checked By B. Siso (<i>DSM</i>) Approved By M. J. Chinembiri (<i>T&DD</i>)	Review / Approved Date

1. This Instruction applies only in connection with construction work done, which results in amendments to the Main System Control Diagrams; i.e., the M240 Series, it does not refer to the Distribution Diagrammatic Lay-Outs.
2. The method of effecting the notification is by means of the memorandum from the responsible Engineer to Protection Engineer and by Form WCD 1 to the Systems Control Engineer. The memorandum shall be sent at least two weeks prior to start of the work.
3. The Systems Control Engineer shall then respond by completing Form WCD 2.
4. The Engineer responsible for carrying out the work shall be the System Development/ Engineering Manager, a Network Manager, Section Engineer or their authorised representatives.

If the work is being supervised by Head Office, proposed changes in the diagrams will be discussed with the System Development/ Engineering Manager and mutually agreed.

5. The alteration and/or additions shall be stated on Form WCD 1 and a sketch which shows the resultant modifications to the Control Diagram, which will come into effect on completion of the work, shall be attached.
6. Upon receipt of the memorandum, the Communications and/or Protection Engineer shall prepare their commissioning programs in conjunction with the Engineer responsible for carrying out the work. When the programs have

been finalised, the Communications and Protection Engineers shall forward them to the Engineer responsible for carrying out the work, copied to the System Development/ Engineering Manager.

7. If the work is to be carried out in more than one stage, then separate Forms WCD.1 and 3 should be submitted, covering each stage in turn.

This procedure will ensure that the System Control Engineer will receive notification of the proposed changes, together with the estimated date on which work will commence.

8. Under emergency conditions, or for any other reason, where it is impossible to give the required two weeks' notice, the Engineer responsible for the work must state this clearly on his/her memo referred to in 2 above.
9. The System Control Engineer shall, on receipt of his copy of Form WCD.1, prepare the switching program required for commissioning the work.
10. The Planning Section Engineer on receipt of his copy of Form WCD.1 shall ensure that the relevant portion of the Main System Control Diagram is altered accordingly and issued to all concerned in accordance with standard procedure, advising the date on which the new diagram is expected to come into effect.
11. Form WCD.3 shall be submitted by the System Control Engineer to the Engineer responsible for the work, with a copy to the System Development/ Engineering Manager, immediately the works have been commissioned. On receipt, this Form WCD.3 shall be routed to the Planning Section Engineer, who shall advise all concerned that the work has been completed and confirming the date on which the revised Main System Control Diagram came into effect.
12. If unable to give the required two weeks' notice, the Engineer responsible for the work must state this clearly on his/her memo referred to in 2 above.
13. The Systems Control Engineer shall, on receipt of his copy of Form WCD.1, prepare the switching program required for commissioning the work.
14. The Network Development Engineer on receipt of his copy of Form WCD.1 shall ensure that the relevant portion of the Main System Control Diagram is altered accordingly and issued to all concerned in accordance with standard procedure, advising the date on which the new diagram is expected to come into effect.
15. Form WCD.3 shall be submitted by the System Control Engineer to the Engineer responsible for the work, with a copy to the Engineering Manager (W), immediately the works have been commissioned. On receipt, this Form WCD.3 shall be routed to the Network Development Engineer, who shall advise all concerned that the work has been completed and confirming the date on which the revised Main System Control Diagram came into effect.
