Harare, Zimbabwe

Dear Sir / Madam

I am a young, hard-working and determined person seeking an opportunity in your organization under the Information Technology (IT) department as the Information Technology Officer. I also have managerial skills, as I led teams to consistently meet project goals a few days ahead of schedule. I am confident that my knowledge, ability and experience will allow me to deliver successful results as the Information Technology Officer.

Here are highlights of my key skills:

- Hardware maintenance
- it support, database management, system troubleshooting, network installation, system design, purchase of IT hardware, software requirements gathering and hardware repairs
- Analysis of requirements from laymen or non-technical personnel
- I'm skilled in the maintenance and management of databases.
- Creation of backups and being concerned on the safety of software systems and their protection against attacks.
- In my capacity as a leader, I learn to apply new information quickly and accurately
- Strong computer skills.
- I have strong programming skills, in fact software designing has become my passion.
- Ability to set up network infrastructure at organizational level.
- Ability to configure routers and secure network.
- Software and systems' management.
- Ability to develop android and web applications at organizational level.

I am certain that I can be an asset.

Your favourable response will be greatly appreciated.

Kind regards

Ashley Mugwambi
